About me

Passionate Web developer over 2 years of experience, eager to expand my skills and contribute to organizational success through dedication and continuous learning. I specialize in creating dynamic and responsive React UI components that elevate user experiences on both web and mobile platforms, and I also work with backend, Familiar with Agile development methodologies.

Experience

Vendekin Technology Pvt Ltd, Pune — Web Developer,
December 2022 - September 2024

VNetra Admin panel (Web App):-

- **Developed and Enhanced Web Application Features**: Led the development of new features for the web application, improving functionality, user experience, and performance. Optimized backend services for better scalability and seamless user interaction.
- **API Integration**: Integrated third-party APIs (e.g., MSG91) for SMS services, enabling real-time notifications and streamlining communication workflows.
- **Google Cloud Functions**: Developed serverless backend solutions using Google Cloud Functions for scalable and efficient request processing.
- **Test Automation with Selenium**: Developed comprehensive Selenium test cases in Java for a web application, achieving over 99% code coverage and ensuring robust functionality across multiple browsers and platforms.
- **Unit Testing for Cloud Functions**: Wrote and maintained unit tests for Google Cloud Functions using Mocha (JavaScript), achieving over 95% code coverage and ensuring reliable serverless architecture.
